

# Report on Weather and Hop Growing Conditions: Week 34

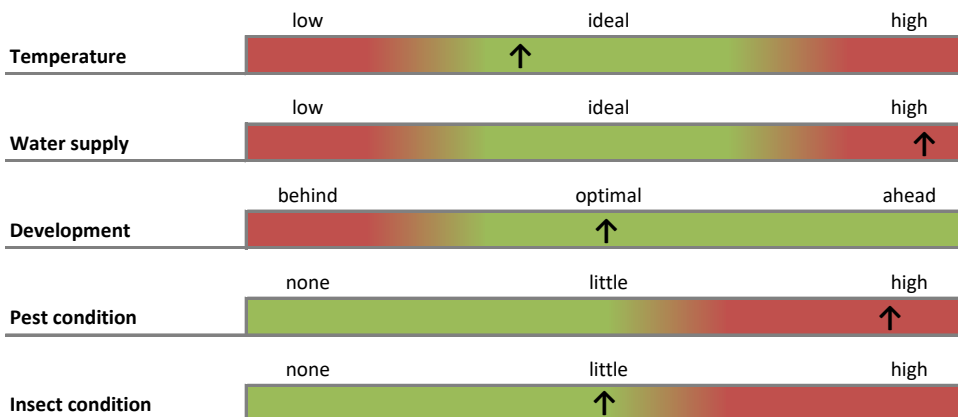

Report Period: August 23, 2021 - August 29, 2021

## HALLERTAU

Variety	Estimation mt	Development
Tradition	5.366,3	+
Perle	5.739,9	+
Magnum	2.632,7	+
Herkules	19.724,7	+

(++ very good; + good; o average; - weak; -- very weak)

(Tendency: stable ↑, decreasing ←, increasing →)

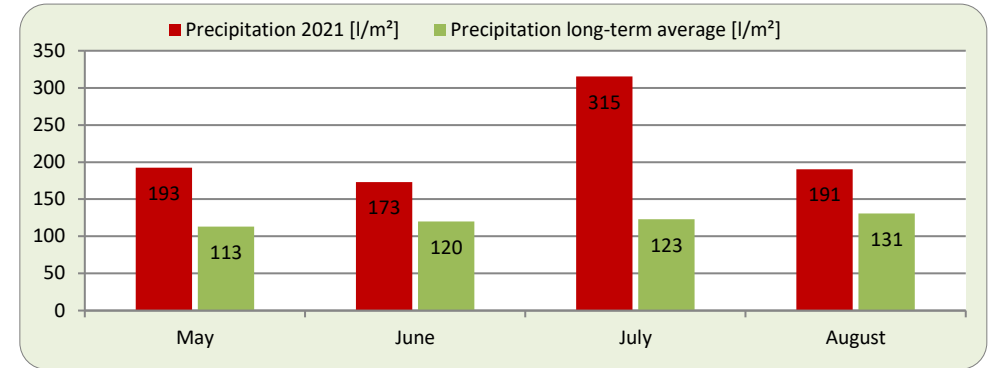

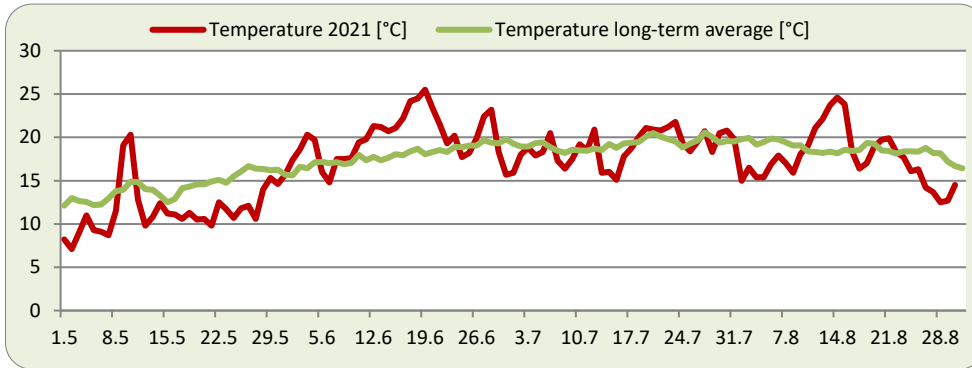

**Comments:** Heavy rainfall, which caused flooding in some areas, further delayed the start of harvest. Meaning that the majority of growers will begin harvesting in the middle to end of this week. The official crop estimate is 41,150 tons, which is slightly above average. Alpha values are expected to be above average.

# Report on Weather and Hop Growing Conditions: Week 34

Report Period: August 23, 2021 - August 29, 2021

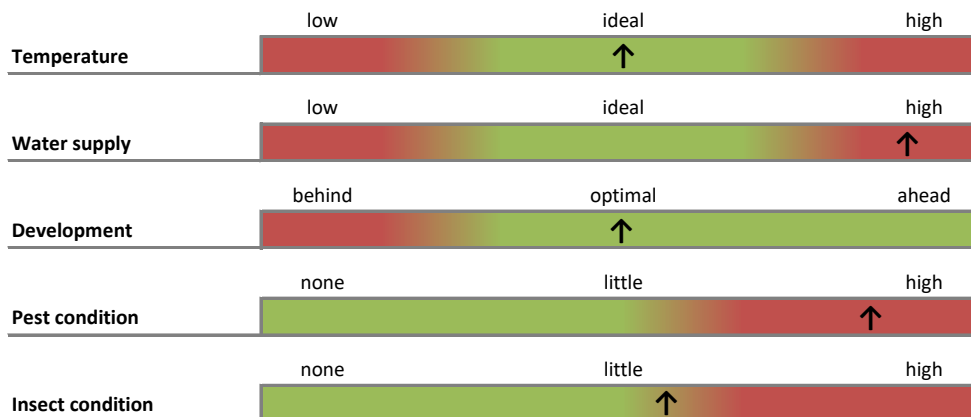

## TETTNANG

Variety	Estimation mt	Development
Tettnanger	997,2	+
Mittelfrüher	249,4	+
Tradition	155,5	+
Herkules	879,2	+

**Comments:** Harvesting has started with the varieties Mittelfrüh and Tettnanger. The estimate for the growing area is 2,885 tons. This corresponds to a harvest volume that is 5% above average.

(++ very good; + good; o average; - weak; -- very weak)

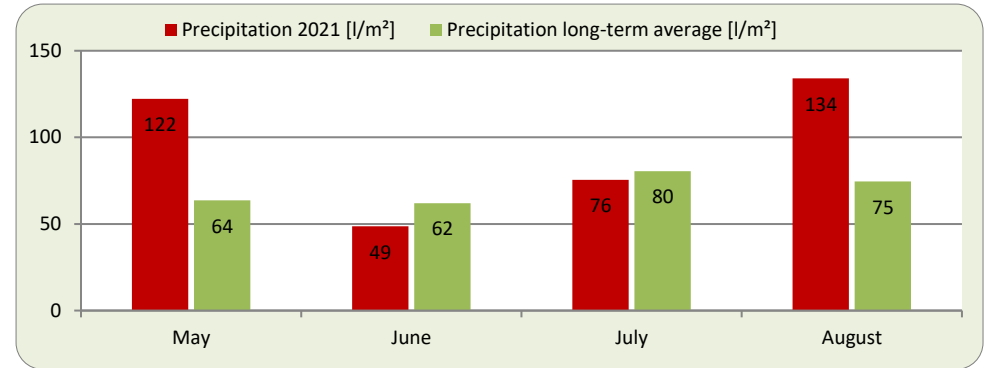

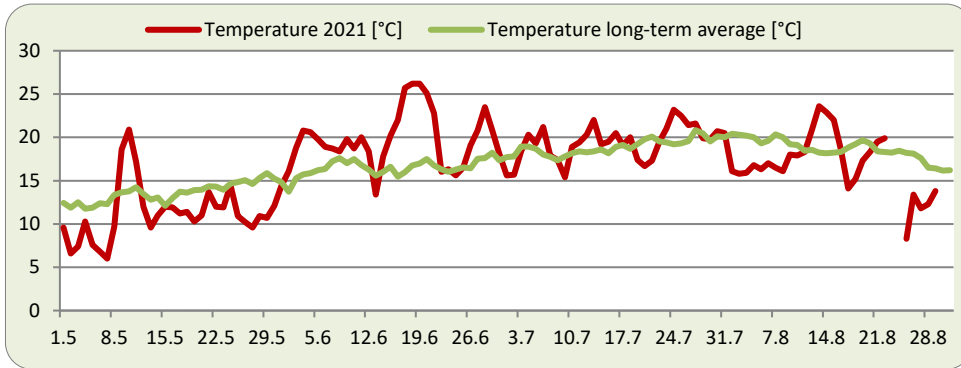

(Tendency: stable ↑, decreasing ←, increasing →)

# Report on Weather and Hop Growing Conditions: Week 34

Report Period: August 23, 2021 - August 29, 2021

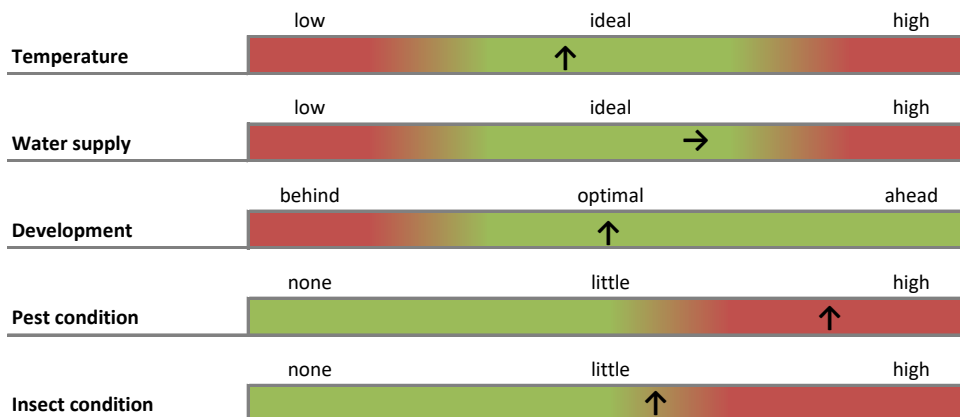

## ELBE SAALE

Variety	Estimation mt	Development
Perle	490,5	+
Northern Brewer	260,5	+
Magnum	1.180,20	+
Herkules	323,1	+

**Comments:** The harvest will begin by the end of this week with the varieties Saazer, as well as Northern Brewer. An above-average crop is expected due to sufficient rainfall throughout the year. The official estimate is 3,058 tons.

(++ very good; + good; o average; - weak; -- very weak)

(Tendency: stable ↑, decreasing ←, increasing →)
