

Report on Weather and Hop Growing Conditions: Week 28

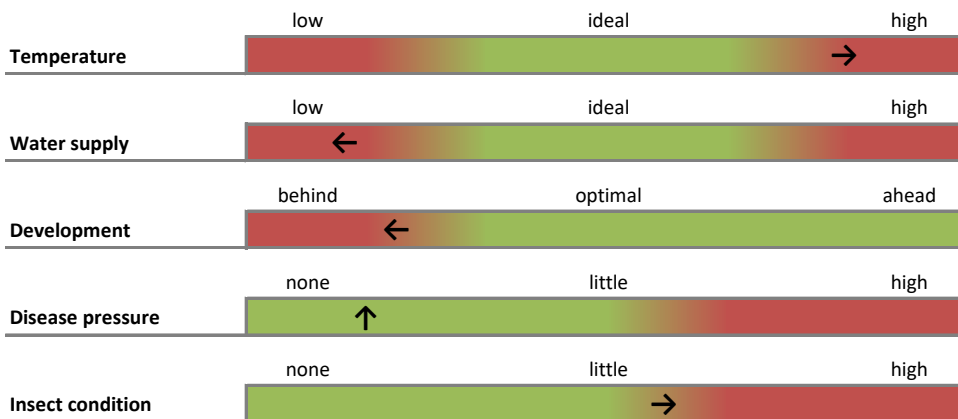

Report Period: July 11, 2022 - July 17, 2022

HALLERTAU

Variety	Comment	Development
Tradition	Flowering	-
Perle	Flowering	-
Magnum	Flowering	-
Herkules	Flowering / head formation	-/o

(++ very good; + good; o average; - weak; -- very weak)

(Tendency: stable ↑, decreasing ←, increasing →)

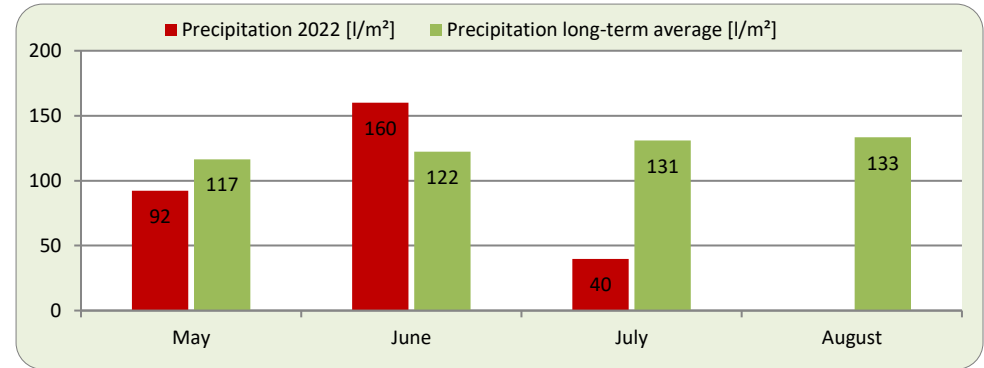

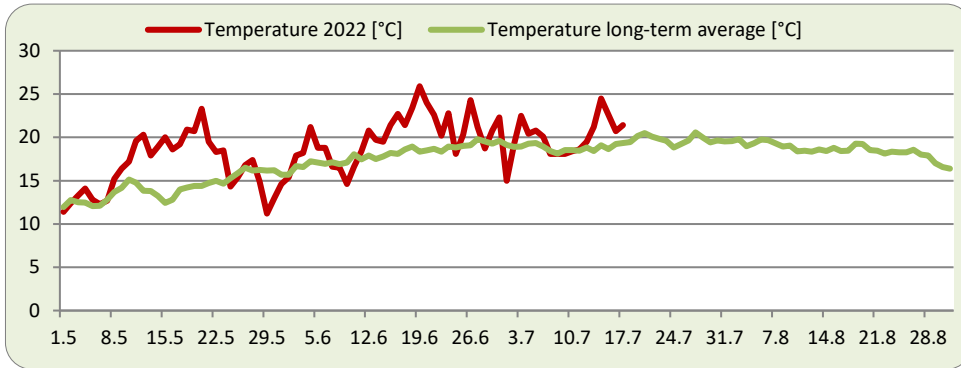

Comments: A warm summer week without precipitation is behind us. All varieties are in the stage of flowering to full bloom, some early ripening varieties are already in the stage of cone set. This means the vegetative growth is finished. Infestation pressure by the red spider mite is present.

Report on Weather and Hop Growing Conditions: Week 28

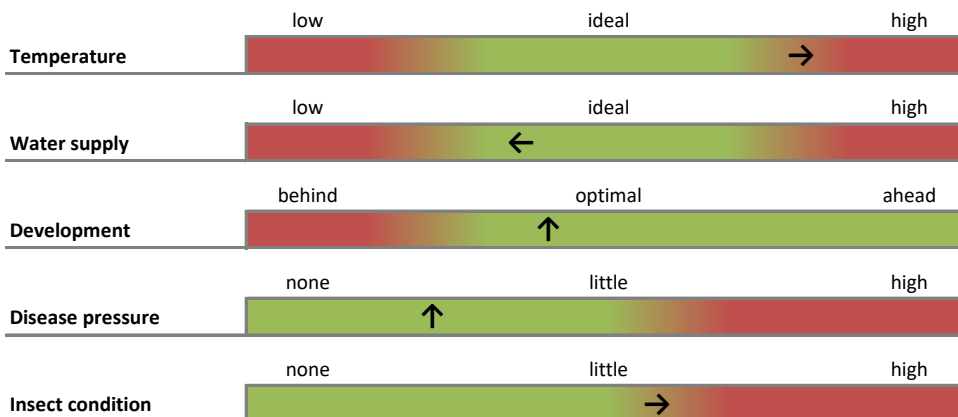

Report Period: July 11, 2022 - July 17, 2022

TETTANANG

Variety	Comment	Development
Tettninger	Flowering / begin cone set	o
Mittelfrüher	Flowering	o
Tradition	Flowering	o
Herkules	Flowering	+

(++ very good; + good; o average; - weak; -- very weak)

(Tendency: stable ↑, decreasing ←, increasing →)

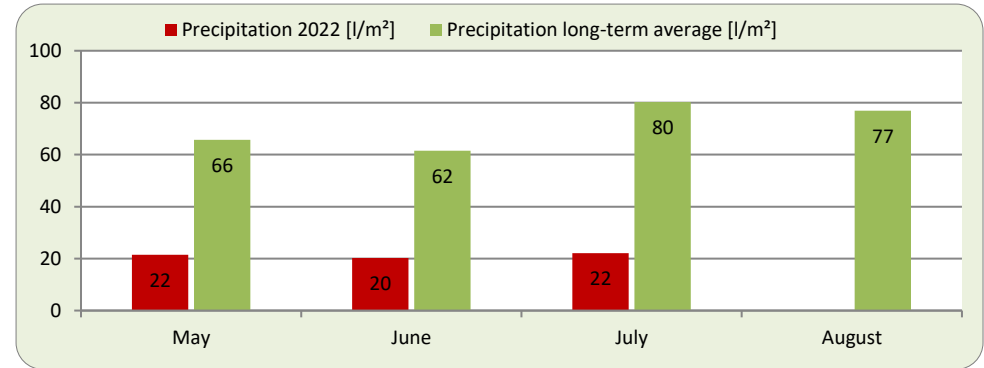

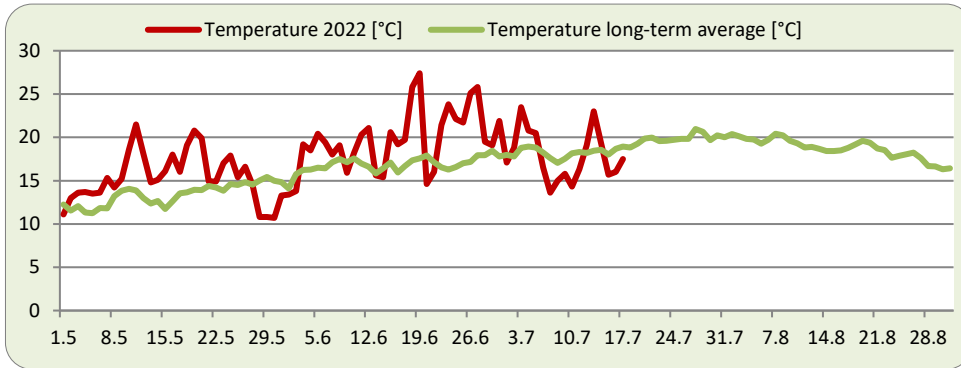

Comments: Summer temperatures above 25° C prevailed, precipitation was absent. However, the soils are currently still supplied with water. All varieties are flowering. More and more often spider mite infestation is detected and treatments against it are carried out.

Report on Weather and Hop Growing Conditions: Week 28

Report Period: July 11, 2022 - July 17, 2022

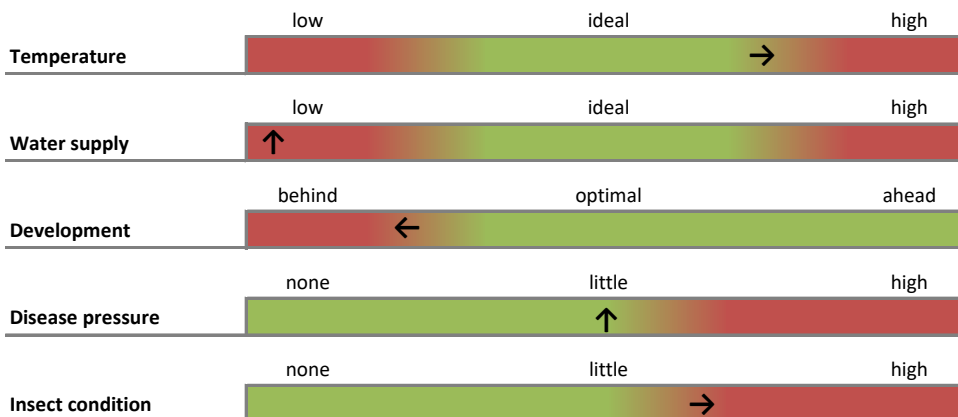

ELBE SAALE

Comments: Precipitation remains absent in the whole growing area. All varieties are already in bloom, and the early-maturing Saazer variety has already begun to develop cones. Plant protection measures against diseases and pests have been carried out.

Variety	Comment	Development
